

Sprint #4 Report Share Yourself Artists Team 2 11/29/2018

Actions to Stop Doing

Since this is our last sprint, there will be no other sprints to focus on. Thus, there will be no actions to stop doing for our “next” sprint.

Actions to Start Doing

After completing our last sprint, our team is now planning on completing test cases for our project. So far we have tested by having others use our site and target the areas we have worked on. We are planning on creating tests which will trigger our functions and compare the output with the expected output.

Actions to Keep Doing

Since this is our final sprint, the only thing left that we have to work on are our test cases. In order for us to make sure this goes right, we have to keep communicating and setting up appointments with the team so then we can all meet up together and discuss testing ideas/strategies and what to test for. Thus, using slack and sending google calendar invites is what we have to keep doing in order to make sure we are coordinated. We have also done well with finishing up our tasks on time so we need to keep up the rate that we finish our work to make sure we finish strong.

Work completed/not completed

We managed to complete User Stories 1, 2, and 3, but were unable to get to User Story 4 which was search engine optimization. This sprint we added functionality to display charts with important business data, a cronjob to distribute free credits to users every

month, and added functionality to trigger pop-ups for Google and Facebook when they enter the email of a linked account in the main login form.

Work completion rate

The total number of user stories completed from this sprint was 3. As a team, we spent 20 hours working on our tasks. In total, we spent our time working on our tasks across 5 days. We completed more than half a user story a day and worked on average 4 hours a day. Our cumulative progress is now 68.5 hours over the course of 17 working days which comes out to about 4 work hours per working day.
