

Sprint 2 Plan, Share Yourself Artist , Team 2, End Date: 11/04 , Revision Date : 10/22

Goal: Allow admins to choose any date interval to bring up artist submissions made in that time frame. We would also like to create a monthly payment report to keep track of our transactions.

Task Listing

User Story 1

“As a team member, we would like to implement a friendly UI for an admin to select a time interval for artist submissions, so that admins have more flexibility in examining artist submissions.”

Task 1: Get a deeper understanding of existing code, specifically areas that address how to filter submissions by date. (3 hrs)

Task 2: Implement a way for a user to input their specified date intervals. (2 hrs)

Task 3: Extract inputted values and create a function to pull such values from the database. (4 hours)

Task 4: Display the data onto the website. (2 hrs)

Total for User Story 1 : 11 hours

User Story 2

“As team members, we would like to create a monthly payment report, so that admins can easily track the company’s transactions.”

Task 1: Extract number of credits bought by artists. (5 hrs)

Task 2: Extract the number of responses made by businesses. (5 hrs)

Task 3: Convert data into currency and display the information. (2 hrs)

Total for User Story 2: 12 hours

Team Roles

Alexis Ortiz Ojeda: Developer, Team Member

Yasunori Iwayanagi: Developer, Team Member

Colin Maher: Developer, Scrum Master

Initial Task Assignment

Alexis Ortiz Ojeda:

- User Story: 1
- Initial Task: Understand existing code, implement user input function.

Yasunori Iwayanagi: User Story 1

- User Story: 1
- Initial Task: Understanding existing code, take user input values and use it to pull data from database.

Colin Maher:

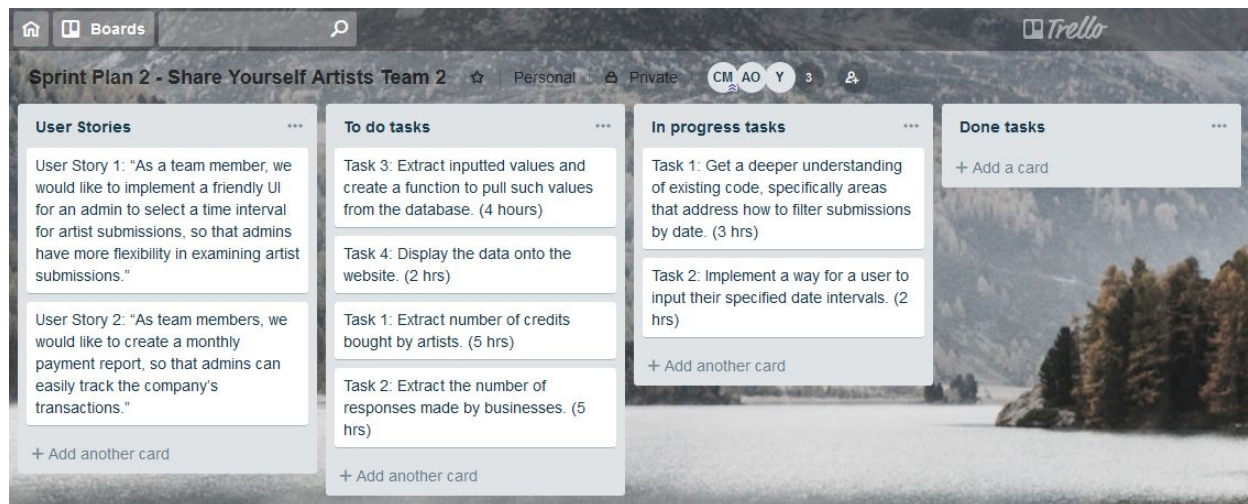

- User Story: 1
- Initial Task: Understand existing code, pull data from database and display them onto the website.
